Professional Summary

Software Engineer with experience in Machine Learning, NLP, Generative AI, RAG, LangChain, and intelligent automation. Skilled in Python, Scikit-learn, Flask, Streamlit, Docker, Prometheus, and Grafana for building production-ready AI applications. Strong foundation in Object-Oriented Programming, Data Structures and Algorithms, SQL, Docker, Linux, and Git. Passionate about building scalable, efficient, and production-ready backend applications.

Technical Skills

Languages: Python, Java, SQL

AI/ML: Scikit-learn, Pandas, NumPy, NLP, Feature Engineering

GenAI: LLMs, LangChain, RAG, OpenAI API, ChromaDB, Prompt Engineering

Frameworks: Flask, Streamlit

Tools: Docker, Git, Linux, Prometheus, Grafana

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Experience

ML Model Developer Intern — SAP-Edunet

Dec 2024–Mar 2025

- Built ML models (Random Forest, Decision Tree, Logistic Regression) achieving up to 98% accuracy.
- Performed preprocessing, feature engineering, tuning, and model evaluation.

Project Trainee — AssetCues Solutions

Mar 2026–Apr 2026

- Developed REST APIs with PostgreSQL and supported backend debugging.

Projects

Self-Healing AI System — Developed an ML-driven self-healing architecture that detects system anomalies using Isolation Forest and automatically triggers fault-recovery actions. Integrated Prometheus + Grafana dashboards for real-time system monitoring and alerting.

Python, Flask, Grafana, Prometheus

Live Demo: resilient-architecture-of-self-healing-a4g8.onrender.com

GenAI Document QA Chatbot — Built a Retrieval-Augmented Generation (RAG) chatbot using LangChain, OpenAI embeddings, and ChromaDB to answer questions from PDF documents with accurate, context-aware responses.

Python, OpenAI, LangChain, ChromaDB, Streamlit

Live Demo: GenAI Document QA Chatbot.onrender.com

CodeInsight AI Code Reviewer — Developed an AI-powered code review platform that detects bugs, explains code, and generates optimized solutions using Gemini API and Retrieval-Augmented Generation (RAG). Implemented an AI Code Reviver to modernize legacy code and improve maintainability through context-aware recommendations.

Python, Streamlit, Gemini API, LangChain, ChromaDB, RAG, Git

Live Demo: codeinsight-ai.render.com/

Education

B.E. Computer Engineering, Trinity Academy of Engineering, Pune

CGPA: 9.30

Certifications

Python Programming

- SAP Machine Learning
- Data Analytics
- GenAI Powered Data Analytics
- MERN Web Development
